

## Econometrics III, NTU 2013 Fall R Programming

---

**Instructor:** Chung-Ming Kuan

**R Programming TA:** Ying-Chin Chen r01323010@ntu.edu.tw

**Textbook:** R Language Definition

**what will be taught in R programming course:**

- Installation and basic prelearning
- Sampling and check some statistical properties
- Loop and basic simulation
- Simulation and hypothesis testing

**Course Objectives:** Let students get familiar with R language, equip with the skills to do some simple simulations and numerical analysis.

**Grading:** Depend on course TA.

**Homework:** Will be related to the content taught. Homeworks should be handed in on the next week in class.
