Expand Healthcare Business in APAC

Onsite 1 – 4 December 2022, TaiNEX 1, Taipei

Online 1 August 2022 – 31 July 2023

I. About

Innovation in Healthcare Driven by Medical Technology

“Hospitals pave the way to connecting upstream-downstream medtech supply chains, being an axis on which the industry, technology development revolves. The government will keep on track investing its efforts into a promising future of precision medicine.” — **President Tsai Ing-Wen**

“The coming of post-Covid era will further Taiwan’s leading position in terms of healthcare. It is envisioned that the country will continue to stay at the forefront of healthcare with its technological strength.” — **Shyi-Kun Yu, President of the Expo General Assembly**

I. About

Innovation in Healthcare Driven by Medical Technology

“The Expo represents the emergence of science, clinical research, cutting-edge technology, medicine and their applications altogether, steering Taiwan’s healthcare industry towards breakthrough and change.” — **Chi-Huey Wong, President of IBMI**

“While AI computing, 5G and information technology are advancing at a lightspeed, the transformation in smart healthcare are counting on innovation in operational models.”

— **Barry Lam, Vice President of IBMI**

“Doctor-invented technologies and health tech startups will bring a momentum to the industry. They can shape the healthcare landscape and address the patient’s needs and the bottleneck in disease treatment.” — **Pan-Chyr Yang, Vice President of IBMI**

“Hospitals spearhead the cross-disciplinary collaboration with their clinical experiences, data and scientific discoveries, they are the engine to energise novel products and solutions.”

— **Chang-Hai Tsai, Vice President of IBMI**

影音檔

One country one center 2.0

- Multi-Countries,
- Multi-Centers in One Country

International cooperation

- Enhance cooperation with the U.S. and Japan
- Collaborate on Epidemic Prevention and Control
- Expand the Halal (Muslim) Healthcare Market

Healthcare industry linkages

- Regulatory harmonization
- Healthcare supply chain linkages
- Expand Taiwan healthcare product market sharing

Regional healthcare connection

- Growth of medical tourism in Taiwan
- Establish overseas medical institutions

People-to-people Links

- Talent training and momentum building
- Strengthen healthcare services for overseas Taiwanese businesses

Optimize resource integration & coordination mechanism and information platform

- Optimize inter-ministerial coordination mechanism
- Refine the functions of the NSP office
- Enhance website and databases

India

National Cheng Kung University Hospital
Held a webinar on Covid-19, 10 thousand doctors from India attended the event; built an image storage system to improve the efficiency of medical service in India.

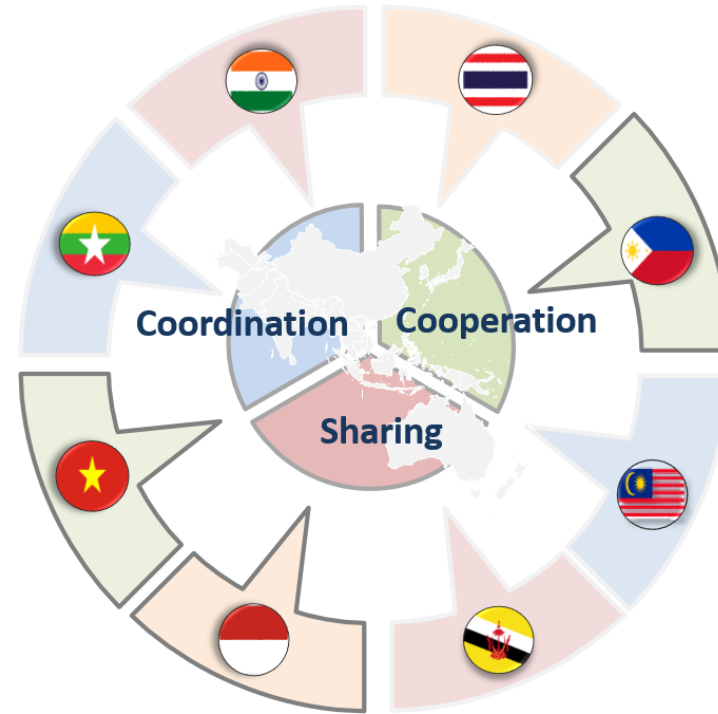

Myanmar

Shin Kong Wo Ho-Su Memorial Hospital
Provide Covid-19 consultation and support services via telemedicine; Operation for a Burmese teenager with hand deformities.

Thailand

Changhua Christian Hospital
Smart Ward/Smart Nurse Station
Cooperate with Chunghwa Telecom/ Thonburi Hospital Group

Malaysia/Brunei

Chang Gung Memorial Hospital
Facebook fan page – Your Daily Doctor

To provide update health education and personalized information to international patients interactively.

China Medical University Hospital
Conducted Cell Therapy research with Malaysia Association for Cell Therapy (MACT), and promoted 5G network plan by assisting virtual reality medical and smart hospital training.

2022 Malaysia-Taiwan Fibrocyte Cell Therapy Conference 2022 & MOU Signing Ceremony
