

Principles of Economics Classroom Experiment (1): The Least Unique Positive Integer (LUPI) game
 經濟學原理課堂實驗(一)：「最小唯一者勝」的彩券實驗

Name _____ Major/Year _____ Student ID no. _____
 姓名：_____ 系級：_____ 學號：_____

Objective: Since the classroom is nearly full, we will use the LUPI (Least Unique Positive Integer) game determine the order of enrollment. 因為教室已滿，因此用本課堂實驗(LUPI game)來決定加簽順序，每一回合獲勝的同學即可加入加簽名單，按照順位遞補加簽。總共能遞補到第幾順位由退選人數決定。

Instruction: In each round, everyone chooses a positive integer from 1 through 100. Whoever chooses the “lowest number that no one else did” wins. If none of the numbers chosen are unique, then nobody wins.

- Suppose, Joseph picks 2, S.W. picks 2, A-Gui picks 10. Then, A-Gui wins.
- Suppose, Joseph picks 1, S.W. picks 3, A-Gui picks 2. Then, Joseph wins.
- Suppose, Joseph picks 1, S.W. picks 1, A-Gui picks 1. Then, Nobody wins.

實驗規則：在每一回合中，每一位考慮加選的同學都要在 1 到 100 當中選擇一個整數。單獨選到某個數字的同學們當中，數字最小的同學就贏得加選資格。舉例來說，如果只有你一個人選 1，那你就贏。但是如果兩個以上選 1，那選 1 的同學都輸，要往上看有沒有人單獨選 2、單獨選 3 等等。

Round 順位	My number 我選的號碼	Winner 贏家號碼	Round 順位	My number 我選的號碼	Winner 贏家號碼	Round 順位	My number 我選的號碼	Winner 贏家號碼
1			6			11		
2			7			12		
3			8			13		
4			9			14		
5			10			15		

In-class Homework: Ten Principles of Economics and their Translations

	Content	Bauman's Translation
Principle 1	People face _____	
Principle 2	The cost of something is what you _____ to get it	
Principle 3	Rational people think _____	
Principle 4	People respond to _____	
Principle 5	Trade can make everyone _____	
Principle 6	_____ are usually a good way to organize economic activity	
Principle 7	_____ can sometimes improve market outcomes	
Principle 8-10	(3 macro principles for Spring Semester...)
