

slido

Choose a positive integer from 1 to 100 (請選擇 1 到 100 之間的一個正整數)

① Start presenting to display the poll results on this slide.

## Economic Lessons of the LUPI Game (從LUPI 彩券看何謂經濟學)

► Swedish Lottery in 2007 (瑞典LUPI 彩券)

Want to Try Again?  
(再來一次?)

(LUPI) Game

to 100

► 請選擇 1 到 100 之間的一個正整數

► Win if choose the **Lowest** but **Unique** number

► 誰選到最小且沒有其他人選的數字就贏了!

► Prize? (贏家的獎勵?)

slido

Try Again! Choose a positive integer from 1 to 100 (再來一次! 請選擇 1 到 100 之間的一個正整數)

① Start presenting to display the poll results on this slide.

6

slido

Last Chance! Choose a positive integer from 1 to 100 (最後一次! 請選擇 1 到 100 之間的一個正整數)

① Start presenting to display the poll results on this slide.

## Economic Lessons of the LUPI Game (從LUPI 彩券看何謂經濟學)

2012 Principles Class LUPI Experiment

2022/9/12

What is Economics?

Joseph Tao-yi Wang

## Economic Lessons of the LUPI Game (從LUPI 彩券看何謂經濟學)

1. A Set of Rules (= Institution) (一套遊戲規則)
  - ▶ Either explicit or implicit (潛規則) (可以是明文規定或不成文的潛規則)
2. Individuals Optimize (個人決策謀求最佳化)
  - ▶ Because people respond to incentives! (因為人們對誘因有反應!)
3. You Need to React to Others Optimizing (其他人也在最佳化, 所以你要因應)
  - ▶ Even if most users follow the rules, the designer still has to stress-test the system. (即使多數人循規蹈矩, 制度設計者仍須考慮有人惡搞怎麼辦)
4. What should the aggregate data look like? (整體結果長怎樣?)
  - ▶ Come up with a theory (model/graph/story)! (理論的預測為何?)

2022/9/12

What is Economics?

Joseph Tao-yi Wang

## Solving the LUPI Game Equilibrium (解出 LUPI 的均衡)

- ▶  $k$  wins if nobody "uniquely chose 1 to  $(k - 1)$ ", nor chose  $k$ 
  - ▶ (選  $k$  贏的條件是沒有人「單獨選 1 到  $(k - 1)$ 」，而且沒有其他人選  $k$ )
- ▶ Assume Number of Players is Poisson( $n$ )
  - ▶ 假設參與人數為Poisson分佈 (平均  $n$ )，混合策略均衡的條件是：
- ▶ Mixed Strategy Equilibrium requires:
- ▶  $\Pr(\text{win} \mid \text{choose } 1) = \Pr(\text{win} \mid \text{choose } 2) = \dots$

$$e^{-np_1} = (1 - np_1 e^{-np_1}) \cdot e^{-np_2}$$

Nobody chose 1  
(沒有其他人選1)

Nobody uniquely chose 1  
(沒有人單獨選1)

Nobody chose 2  
(沒有其他人選2)

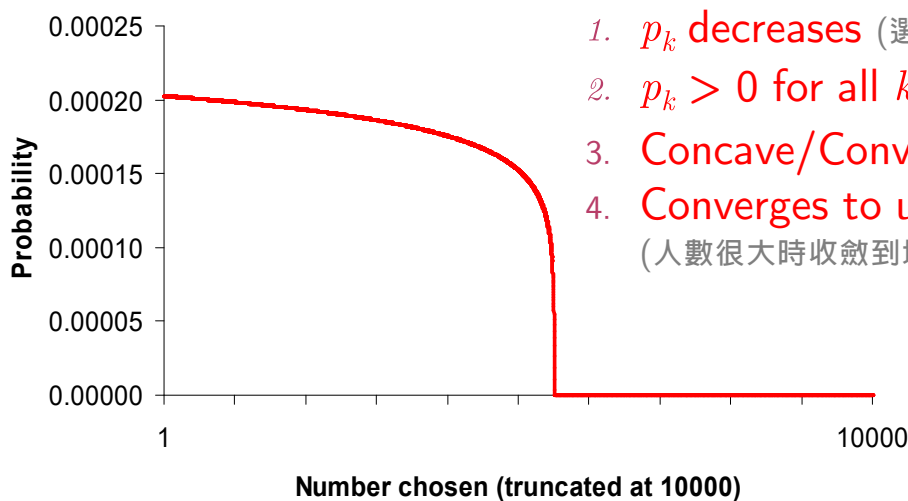

2022/9/12

What is Economics?

Joseph Tao-yi Wang

## Unique Poisson-Nash Equilibrium (Mixed)

唯一Poisson  
混合策略均衡

1.  $p_k$  decreases (選k的機率遞減)
2.  $p_k > 0$  for all  $k$  (所有數字都選到)
3. Concave/Convex (凸函數/凹函數)
4. Converges to uniform if  $n$  large (人數很大時收斂到均勻選擇)

2022/9/12

What is Economics?

Joseph Tao-yi Wang

## Conclusion (小結)

- ▶ Traditionally, resources are scarce, so economists focus on **Production and Consumption: Manage Resources Efficiently**
  - ▶ 舊經濟時代聚焦在資源有限，經濟學處理生產和消費：解決資源有效運用的問題
- ▶ But in the Meta Economy, resource is no longer the focus!
  - ▶ More important are human reactions to information/institutions
    - ▶ 但在知識經濟時代，資源不再是重點！更重要的是人們對資訊、對制度的反應
- ▶ So, Economics = **For any Institution, There's a Reaction!**
  - ▶ Given a set of rules, how people optimize; whether empirical data confirms theory, and to find institution origins and improvements
    - ▶ 因此，現代經濟學研究的是「上有政策，下有對策」：在一套遊戲規則下，人們如何謀求自身最佳；看實證資料如何印證理論，並思考這個制度如何改進、從何而來。
