Brownian Motion and Dirichlet Boundary Problem

Chi shian Dai

June 12, 2015

Abstract: In this talk, I would like to talk the relationship between Brownian motion and Dirichlet boundary problem. There are no specific prerequisites for audience.
Through this talk, I wish I could achieve the following goal:

1. Random walk on a graph.

2. Solve discrete Dirichlet boundary problem by random walk.

3. Some property of Brownian motion.

4. Solve Dirichlet boundary problem by Brownian motion.

5. Sufficient boundary condition.
