B.

Prof. Chii-Shen Yang

Friday, October 28, 2022

12:10-13:10

Rm. B10, New Agricultural  
Chemistry Bldg.

Nowadays, the rapid expansion of transnational talent flows makes English and multilingual ability an indispensable tool. As a key school for the MOE's "Bilingualized Learning Plan for University Students", NTU actively promotes and establishes an English-rich environment (EMI education) to enhance the international competitiveness of students and Taiwanese higher education.

In order to understand everyone's views on bilingual education and EMI courses, we would like to invite our CLS faculty and students to exchange opinions in this **Student-Teacher Conferences "About Bilingual: Don't push me; inform me"**. It will enable us to improve our teaching/learning effectiveness in English and future plan.
