

# NTU Library Remodeling Project

NTU Main Library has assisted students and faculty in advancing their learning and research since 1998. However, the users' needs and expectations for the Library have significantly varied through these years. In response, the "NTU Library Remodeling Project (Since 2022)" will transform the 1st floor of Main library into a more sustainable, flexible, and inspiring environment for NTU members.

Except for the project, the library still needs more supports for further space renovation, such as the 24-hour study room and multifunctional conference hall. Hence, we sincerely invite you to participate in the future remodeling. The Library appreciates any kind gesture.
